We believe the privatization of ServiceOntario will result in:

- Increased risk of identity theft and fraud;
- The loss of government revenue (\$2.7 billion annually) that funds programs like health care and education;
- Higher user fees for the public; and
- The closure of some ServiceOntario counters.

The downloading of services and the potential outsourcing/ privatization of ServiceOntario remains a serious and very real threat to the Kingston community.

Come out, show your support, and help educate the public. With the Drummond report looming, it's now time to step up and make some noise. Let people know what's happening!
